

# **An internet website**

The idea behind the creation of the website is to inspire organizations which work for the protection of carnivores from other European countries to combine forces for the preservation of wolf, lynx and bear's populations, and to establish a platform for sharing experience and leading methods together with a collection of information about the situation of the large carnivores in European countries - the first internet platform of such kind in Europe.

**We kindly welcome you to contact us as well as to cooperate with us.**
